

LISHI LASER

N₂/O₂ Mixed Gas Device

Replaces the air compressor. 95% less electricity, 3× faster cutting, zero burrs. Brazil has the 2nd largest manufacturing sector in the Americas — and industrial electricity at 2× China's rate. This device turns that cost gap into competitive advantage for Brazilian job shops.

2nd

Largest manufacturing in the Americas (after US)

2 kW

Mixer power draw vs 37+ kW for a compressor

~\$11,000

Annual electricity savings per laser, single shift

16–27

Month payback on electricity savings alone

Quick Comparison: Mixed Gas Device vs Air Compressor

FACTOR	N ₂ /O ₂ MIXED GAS DEVICE	AIR COMPRESSOR (50HP)
Power consumption	~2,000 W	~37,000 W
Annual electricity cost	~\$620 USD	~\$11,600 USD
Cut edge quality	Burr-free, weld-ready	Oxidized edge, needs grinding
Cutting speed	3× faster than O ₂	1× (baseline)
Maintenance	Near zero	Filters, oil, belts
Grinding labor	Eliminated	\$6,000–\$12,000/year (BR labor)

Why Brazil Is a Strong Market

2nd largest manufacturing in the Americas

\$580B manufacturing GDP. Automotive (22% of industrial GDP), aerospace (Embraer), agricultural machinery, steel, white goods — all heavy sheet metal users.

Electricity 2× China's industrial rate

~\$0.15/kWh plus seasonal surcharges (bandeiras tarifárias) during dry periods. Every watt-hour saved goes to the bottom line. For a 3-laser shop, savings exceed \$33,000/year.

CO₂ → Fiber laser transition underway

Brazilian shops are upgrading from older CO₂ lasers to high-power fiber. Every new 12kW+ installation is a gas mixer candidate — no legacy compressor to depreciate.

1,500–2,500 shops with 12kW+ lasers

Estimated addressable market, larger than Mexico due to bigger manufacturing base. At 5% penetration over 3 years = 75–150 units.

Key Industrial Clusters

ABCD Paulista, SP

Brazil's Detroit — VW, GM, Toyota, Ford + thousands of Tier-1/2 metal suppliers

S. José dos Campos, SP

Embraer HQ + 200+ aerospace precision fabricators

Belo Horizonte, MG

Steel state — Gerdau, Usiminas, heavy fab, mining equipment

Porto Alegre, RS

Ag machinery — John Deere, AGCO, CNH, harvester supply chain

Joinville, SC

Metal-mechanic hub — Whirlpool, Electrolux, WEG, 5,000+ SMEs

Curitiba, PR

Renault, VW, Audi plants + growing SME fabricator ecosystem

Actively Seeking a Distributor in Brazil

LISHI LASER is expanding in Latin America. We are looking for an established distributor with sheet metal industry connections to represent the Mixed Gas Device in Brazil. Exclusive territory, factory-direct pricing, full technical support, Portuguese-language materials ready.
